

Pod

Pod

configmap nginx.conf

```
graph LR; Pod1[Pod] --> CM[configmap nginx.conf]; Pod2[Pod] --> CM;
```

The diagram illustrates a Kubernetes architecture where two Pods share a single ConfigMap. On the left, two light blue rounded rectangular boxes, each labeled 'Pod', are stacked vertically. On the right, a similar box is labeled 'configmap nginx.conf'. A thin light blue arrow originates from the top-right corner of the upper Pod box and points diagonally upwards to the left side of the ConfigMap box. Another thin light blue arrow originates from the top-right corner of the lower Pod box and points diagonally upwards to the same left side of the ConfigMap box, demonstrating that multiple Pods can reference the same ConfigMap.
